
weighting step 1 makes the matched sample resemble the sampling frame
Sampling frame
Target sample
Drawn by stratum
held until fieldwork ends, then matched
ACS variables
Variables attached from other surveys
Records sampled into the target sample
YouGov
Other panels
Election Day
Matching only
Matching + weighting
Matched cases
e.g., education
e.g., age
e.g., religion
Frame weighting
Post-strat.
Panel reservoir
Opt-in online panels
Invited
Completed
Target case
Completed interview
Matched
Closest respondent to each target case
Weighting step 1: Frame weighting
Via propensity scores or entropy balancing
Weighting step 2: Post-stratification
To demographic and political margins
